Recent Projects

Website Portfolio

Developed a personal portfolio website using JavaScript. You can check it out and you can also find some projects I have done. Here is the link:

<https://phirianthony-portfolio.vercel.app/>

Mzati - House Rental Searching Platform

Developed a web-based platform for house rentals as a final year college project utilizing HTML, CSS, PHP & MySQL. Here is the link of video

showcasing my project: <https://drive.google.com/drive/folders/1H-3kwkUzgNXOEvcGvBH6s5v8sdvs2Tio?usp=sharing>

Icegate Fashion Plus

Currently, I am working on the development of a web-based platform for buying and selling second-hand clothes and shoes. Here is the link of the

demo prototype: <https://onlinesellsecondhandclothes.vercel.app/>

Projects

Dice game webApp

The Dice Game is a JavaScript-based application that supports multiple languages, including Chichewa and Tumbuka. It offers players an immersive gaming experience with localized interfaces and instructions in their preferred language. This enhances accessibility and inclusivity, allowing a wider audience to enjoy the game. Here is the link for the live demo: <https://dice-game-beta-three.vercel.app>

NB: you can also access my projects on the GitHub link provided in my Portfolio Website
