Projects

Dice game webApp
The Dice Game is a JavaScript-based application that supports multiple languages, including Chichewa and Tumbuka. It offers players an immersive gaming experience with localized interfaces and instructions in their preferred language. This enhances accessibility and inclusivity, allowing a wider audience to enjoy the game. Here is the link for the live demo: https://dice-game-beta-three.vercel.app

NB: you can also access my projects on the GitHub link provided in my Portfolio Website

Hobby
